EXPERIENCE

Data Analyst | Growth Natives | Mohali, India | Feb 2025 - Present
- Design and maintain 15+ Power BI, Tableau, and Looker Studio dashboards that provide clear visualizations of complex marketing and business data.
- Compile and analyze data across multiple marketing channels, enabling stakeholders to track 20+ KPIs and better understand day-to-day business and campaign performance issues.
- Deliver recurring weekly, monthly, and quarterly reports to 10+ stakeholders, translating data into straightforward, actionable business insights.
- Partner with SEO, PPC, and marketing teams to analyze Google Ads, paid advertising, and campaign performance data and support data-backed optimization decisions.
- Develop AI and automation solutions for analytics workflows, including a Google Ads Health Checker that automates account diagnostics and reduces manual audit effort.

Entrepreneur in Residence (Business Analyst) | The Future University | Mohali, India | Jun 2024 - Jan 2025
- Conducted market research and business analysis across 5+ industries, compiling data related to business issues and delivering data-backed strategy reports.
- Defined 10+ KPIs and developed Excel-based reports for leadership teams to improve visibility into business performance.
- Supported business growth by improving KPI visibility and access to decision-relevant information for 20+ stakeholders.

PROJECTS

Google Ads Health Checker
- Built an AI-powered Google Ads auditing solution to automate account diagnostics and support faster analysis of advertising performance.
- Automated portions of the audit workflow, reducing manual audit effort and helping surface account-level issues for review.

AI Makeup Shade Finder
- Developed an AI-powered makeup shade recommendation system that analyzes facial images and recommends personalized foundation shades based on skin tone.
